

South Waterfront Improvement Project

The Rowayton Yacht Club has never been more beautiful, and access to the water has never been more desirable.

Imagine if we cleaned up the area along the stone wall we currently use for storage, and made it accessible to members and their families.

The Board has begun an initiative to clear the waterfront area adjacent to the south parking lot and make it available for sunning, strolling, and dining. This will enhance the RYC experience and add much needed space for a growing club.

The enhancements to the Club will be funded solely by individual contributions. RYC club funds will not be used for the project, but we are asking members to donate if they are in a position to do so. The first phase of the project was completed in the spring of 2017.

The level of improvement will be tied to the amount raised. We appreciate your support, and your contribution at any level. Your RYC Board of Directors has started the fundraising and to date has raised more than \$12,000 toward the total which is expected to exceed \$20,000.

Please indicate your individual voluntary contribution to this cause and send a check to the address below:
